Washington 25, D. C.

July 5, 1963

MOST GRAINS ADVANCE

Most cash grains closed firm to higher during the holiday-shortened week ended July 3. Spring wheat, however, finished substantially lower.

Hard winter wheat edged up 1-2¢ per bushel at most markets. Demand was strong on continued light offerings. Some domestic interests purchased hard winter wheat flour to cover five-month needs. Red winter prices followed the stronger trend prevailing in the hard division. Harvesting is moving ahead rapidly in the red wheat area. Spring wheat prices dropped 13¢ at Minneapolis. Premiums were also about 10¢ lower. Durum held about steady. The downward adjustment in spot wheat followed the announcement that CCC will sell wheat based on the 1963-crop loan - about 18¢ lower than 1962. White wheat lost 4-5¢ in the Pacific Northwest, while hard winter wheat dropped sharply, 10-11¢, reflecting generally slow trading and an adjustment to a new-crop basis. Rye advanced 1¢ per bushel at Minneapolis.

Corn prices moved up 1-3¢ per bushel. Strength was attributed to continued strong demand, domestic as well as export, and limited spot market offerings. Oats held firm on limited offerings in slow trading. Malting barley was off 2¢ on fairly large offerings at Minneapolis, while on the West Coast barley prices were mostly adjusted to a new-crop basis. Grain sorghum prices closed 3¢ per cwt. higher behind improved demand for limited offerings at Kansas City and 2¢ higher at Ft. Worth where generally buyers are awaiting new-crop arrivals.

Soybeans finished around 2-4¢ per bushel higher with the advance in the futures market. Strength was also attributed to trade interest belief that yields may be reduced by continued lack of general rain, hot and dry weather. Cash offerings continued to meet ready acceptance. Flaxseed held steady in quiet trading in Minneapolis.

Special Features

	<u>Page</u>
Food for Peace Authorizations, June 27-July 3, 1963	2
Average farm prices, parity and support rates	2
Grains - export prices at specified points	2
Cash wheat prices and effective support	6

^{1/} Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Current sales do not include nonstorable grain or grain destined for export.

STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 11 No. 28

Washington 25, D. C.

July 12, 1963

GRAIN PRICES MOSTLY UNCHANGED TO LOWER

Wheat and soybean prices generally declined during the week ended July 11, while other grains were about unchanged. Feed grain production in 1963 will be 3 percent above last year while the wheat crop will be 2 percent larger, according to the July Crop Report.

Winter wheat prices were mostly 2-4¢ lower with offerings at most markets in excess of the rather slow demand. Receipts were at about the season's peak. Spring wheat dropped 3-4¢ at Minneapolis with mills operating on low inventories. Flour trade was limited. Durum wheat was unchanged but most offerings were owned by CCC. Wheat markets were quiet in the Pacific Northwest with white wheat 1-2¢ higher. Export business was slow. Rye weakened along with wheat but the market was thin with offerings light. Prices were 1¢ lower at Minneapolis.

Corn prices were mostly unchanged to 1¢ higher with a continued moderate demand. Buying was mainly for immediate needs. Oats were unchanged to 2¢ lower reflecting a light demand. Barley markets were little changed with the better qualities selling rather well. Grain sorghum lost 1-2¢ per cwt. due in part to increased offerings.

Soybeans dropped 5¢ per bushel as timely rains improved crop prospects in most of the important producing areas. Export business was only moderate. Flaxseed held steady in quiet trading in Minneapolis.

A special breakdown of U. S. wheat shipments from Canada is shown on page 9 of this report. Around 14.5 million bushels of wheat were shipped to Canada for export during the season. During the same period 15.5 million bushels of U. S. wheat were inspected for export from Canadian ports. Stocks of U. S. wheat in Canada on July 1 this year were smaller than a year earlier. There is also a lag in reporting shipments to Canada and shipments from Canada.

^{1/} Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Grain Market News

WEEKLY
SUMMARY
AND
STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 11 No. 29 Washington 25, D. C. July 19, 1963

GRAIN PRICES MOSTLY LOWER

Cash grain markets generally declined during the week ended July 18. Corn markets showed the biggest loss with soybeans and oats also down. Other grains generally closed about unchanged to lower.

Hard winter wheat closed on a weak tone with prices unchanged to 1¢ per bushel lower. Movement of wheat fell off as harvesting eased off. Domestic and export demand was rather dull. Soft red wheat was mostly firm with offerings liberal. Spring wheat declined 1¢ per bushel reflecting only a fair demand for light offerings. Durum wheat was unchanged to 5¢ lower. White wheat closed about unchanged in the Pacific Northwest despite a rather good export demand. Rye declined 1¢ per bushel with about one-fourth of the crop harvested in South Dakota.

Corn prices declined 2-5¢ per bushel reflecting in part improved crop prospects, larger offerings and only moderate demand. Good rains in much of the corn belt helped relieve the droughty conditions. Oats averaged 2-3¢ lower due in part to increased new-crop offerings. Barley prices averaged about unchanged for old-crop offerings while the new crop was down sharply. Grain sorghum prices were unchanged to 1¢ lower at Kansas City but dropped 6¢ per cwt. at Ft. Worth with harvest expected to begin within a week to 10 days.

Soybean prices declined 1-5¢ per bushel. Timely rains in most of the drier areas improved prospects for the new crop. Trading in both the export and domestic markets was light. Flaxseed held steady in quiet trading in Minneapolis.

* "INSPECTION PLUS CORRECTION EQUALS PROTECTION" *
*
* National Farm Safety Week - July 21-27 *

GRAIN EXPORTS ... during the crop year ending June 30 were 2 percent below the previous year on the basis of inspections for export. Exports of all grains totaled 1,312 million bushels during the year as against 1,334 million -- the record for 1961-62. Wheat (grain only) exports totaled 534 million compared with 607 million in 1961-62. Corn exports during the July-June period at 387 million were only 5 million below the previous record. Soybean exports hit a record 171 million in the fiscal year as against 148 million a year earlier. Grain sorghum, oats, rye and flaxseed exports were larger than last year while exports of barley were down. Of the total wheat exports last season 343 million were hard red winter, a drop of 53 million from the previous season. Around 114 million were white or about the same as the previous year. Due to smaller supplies, soft red winter wheat exports totaled only 37 million -- nearly 16 million below the year before. Spring wheat exports were also down slightly. Again India was this country's largest customer -- taking over 130 million bushels of wheat during the July-June period. Of this 91 million were hard red winter and the balance white wheat. Pakistan imported 53 million from this country of which 31 million were hard red winter and 20 million white. Nearly all of the 52 million imported by Brazil were hard red winter wheat. (Inspections for export by class of wheat by country is shown on page 7.)

NEW PUBLIC LAW 480 PROGRAM ... to encourage dollar export sales of U. S. agricultural commodities was announced July 17. The program, authorized by Congress in an amendment to Title IV of P. L. 480, allows the Secretary of Agriculture to extend long-term, low-interest credit to U. S. and foreign private enterprise entities for financing sales of certain U. S. agricultural commodities for export to friendly countries. Previously, P. L. 480 sales programs were limited to agreements with governments of friendly nations.

FOOD FOR PEACE ... exports under the Title I, Public Law 480 (sales for foreign currencies) program reached a record level for the second consecutive year. Nearly 12.9 million metric tons of agricultural commodities with an estimated export market value of \$1.072 billion were shipped abroad during the year ending June 30, 1963. The previous record volume was 12.3 million metric tons valued at \$1.015 billion during the year which ended June 30, 1962.

Grains: Export prices basis prompt or 30-day shipment, July 18, 1963

1/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Oct. 1, 1961-July 13, 1962								130,826

Based on weekly reports of inspections by licensed grain inspectors. 1/ Superior. 2/ Port Allen.

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Current sales do not include nonstorable grain or grain destined for export.

STATISTICS

GRAIN DIVISION AGRICULTURAL MARKETING SERVICE
UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 11 No. 30

Washington 25, D. C.

July 26, 1963

GRAIN MARKETS MIXED

Grain markets followed a mixed trend during the week ended July 25. Wheat continued to decline with lower prices reported for grain sorghum also. Soybeans advanced sharply with more moderate gains for corn. Other grains were about unchanged.

Hard winter wheat declined 2-3¢ per bushel while red winter lost 5¢ during the week. Increased offerings of red wheat and expanding spring wheat harvest were major factors undermining values. Export demand was slow while little flour booking was done. Spring wheat dropped 3-11¢ with the lower range reflecting adjustment to new crop supplies. Carlot receipts at Minneapolis increased. Durum wheat dropped 5¢ despite increased semolina sales. White wheat declined 1¢ per bushel in the Pacific Northwest reflecting expanding new crop harvest and cautious buying interest. Rye lost 1¢ per bushel reflecting a slow demand and the trade waiting for the next crop.

Corn markets were mostly unchanged to 2¢ higher except at Chicago where prices declined moderately. The weather was mostly favorable in the heavy producing Corn Belt. Sustained demand from exporters and elevators were the main strengthening factors. Oats were unchanged to 1¢ per bushel lower as new crop supplies were received. Demand was fair. Barley prices were about unchanged despite increased offerings from the new crop. Grain sorghum prices went down another 3¢ per cwt. at Ft. Worth and 1¢ at Kansas City. Harvest had begun in the Texas area. Demand was good for new crop grain.

Soybeans advanced 6¢ per bushel during the week. Crop prospects continued favorable. The continued heavy crush together with good domestic and export demand were strengthening factors. Flaxseed held steady in quiet trading at Minneapolis.

Special Features

	<u>Page</u>
Imports of wheat, oats, barley, rye, and corn for seed under Federal Seed Act	2
Grains - export prices at specified points	2
Feed grains - CCC sales against Certificate Pool	6
Food for Peace Authorizations, July 19-25, 1963	6
Wheat - amount repaid, delivered, and outstanding under price support by States	7
Corn - amount put under price support by States	8
Grains - U. S. stocks by position, July 1	9
Grains - CCC-owned stocks by States, June 30	10-11
Wheat - CCC-owned stocks by classes, June 30	12

1964 FEED GRAIN PROGRAM ... will be basically the same as the successful 1963 program. The major change is an increase in the top limit on diversion from a farm's base acreage with an increase in the rate of payment for maximum diversion. In 1964 a producer may divert as much as 50 percent of his feed grain base acreage (in 1963 it was 40 percent), and those who divert from 40 to 50 percent will receive diversion payments at the maximum rate for all acres diverted. The support loan and payment diversion will be as follows:

	<u>Loan Rate</u>	<u>Support Payment</u>	<u>Total Support</u>
Corn (per bu.)	\$1.10	\$0.15	\$1.25
Barley (per bu.)	0.84	0.12	0.96
Grain sorghum (per cwt.)	1.77	0.23	2.00

Imports of wheat, oats, barley, corn, and rye for seed
under the Federal Seed Act, 1957-63

Year beginning July 1	Wheat	Oats	Barley	Rye	Corn
			-- Bushels --		
1957-58	3,507,871	648,106	18,150	31,784	42,905
1958-59	4,013,336	338,588	9,098	491	60,989
1959-60	4,358,995	366,334	34,977	1,107	41,036
1960-61	4,825,608	354,706	55,471	850	46,625
1961-62	2,940,193	443,097	15,473	418	45,409
1962-63	3,507,918	519,584	30,419	2,520	25,466

Grains: Export prices basis prompt or 30-day shipment, July 25, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum ^{2/}

1/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 6 No. 3

Washington 25, D. C.

July 26, 1963

Grain prices followed a mixed trend during the past quarter. Wheat prices declined sharply due to the lower support rate. Oats, barley, rye and flaxseed declined moderately. Corn, grain sorghum and soybeans advanced during the period. Stocks of wheat, corn, soybeans, grain sorghum and rye on July 1 were well below a year ago. Stocks of barley and flaxseed on the same date were larger.

WHEAT ... prices in July ranged 8-35¢ per bushel below a year ago due in part to larger crop of soft red winter and white wheat and to the lower support rate. July prices averaged 28¢ per bushel under April. A drop of 18¢ in the 1963 support rate is offset by a direct payment of that amount to the producer. Hard winter wheat prices in July were 18-20¢ below a year earlier while red winter prices were 30-35¢ lower. The soft red winter wheat crop was up by 25 percent while white wheat was up by 13 percent. Soft white wheat in the Pacific Northwest was down by 23¢ per bushel. Spring wheat at Minneapolis ranged 8-14¢ below last year while durum was 27¢ lower. Carryover stocks of wheat on July 1 totaled 1,189 million bushels -- 132 million below last year. The smaller carryover resulted from heavy exports of wheat and flour which totaled 636 million bushels. These were 82 million below 1961-62 but 90 million above the previous 5-year average. Milling of wheat for flour was down due to smaller exports and totaled 604 million. Domestic supplies of wheat for 1963-64, based on July 1 conditions, totaled 2.3 billion bushels -- 115 million less than for 1962-63.

RYE ... prices declined only moderately during the past quarter with the July average 6¢ per bushel above a year ago. Strengthening factors were the smaller stocks and prospects for a 29-percent reduction in the 1963 crop. Domestic rye supplies for 1963-64 are estimated at 36 million bushels -- 13 million less than for 1962-63. July 1 stocks of less than 7 million are 12 percent below a year earlier and 35 percent below average. Disappearance of almost 43 million bushels was up 8 million from the previous season due to larger exports which totaled 21 million -- nearly three times 1961-62. Usage for alcohol was down but milling for flour was up slightly.

CORN ... prices advanced 11-12¢ per bushel during the past quarter due in part to good domestic and export demand. Strengthening factors were smaller CCC stocks and larger livestock numbers. Prices the first three weeks of July were 15-20¢ above a year ago. Stocks of corn in all positions on July 1 totaled 2.1 billion bushels -- 355 million below last year and 700 million below the record of two years ago. CCC stocks on July 1 totaled 505 million bushels. Production of corn was forecast July 1 at 3.8 billion bushels -- 6 percent more than in 1962. Corn disappearance, October-June, totaled 3.2 billion bushels -- about the same as a year earlier. Exports of 306 million

were 19 million below last year's record high. The use of corn in wet milling at 131 million was the largest of record. Other commercial uses were about average. A record of 2.6 billion was used for feed the first 9 months. Feed usage of 15.1 bushels per animal unit compares with 15.4 last season and 13.5 the 5-year average.

OATS ... prices declined moderately the last quarter of the season due in part to the smaller disappearance. Despite the drop prices in July were 3¢ per bushel above a year ago. The smallest crop since 1939 was in prospect July 1 with production estimated at 966 million bushels. Carryover stocks of 277 million were about the same as last year but 9 percent below average. Domestic supplies for 1963-64 at 1,243 million bushels are 64 million less than for 1962-63. Disappearance of oats last season totaled 1,035 million bushels -- 25 million below the previous season. Exports of 23 million were 4 million above the year before.

BARLEY ... prices declined sharply the last quarter of the season for feeding varieties but malting types were generally steady. Feeding barley prices the first three weeks of July were down 13-18¢ in the Midwest and the Pacific Northwest but at about last year's level in California. Domestic supplies of barley for 1963-64, estimated July 1 at 519 million bushels, will be down by 34 million bushels. Larger carryover stocks were more than offset by a drop of 13 percent in the 1963 crop. Disappearance of barley last season at 410 million was 30 million below 1961-62. Exports of 64 million were down by 18 million while feed usage was 12 million less. Industrial usage, mainly beer and alcohol, totaled 92 million -- up slightly from the year before. Imports of 2 million were down sharply from recent years.

GRAIN SORGHUM ... prices advanced steadily the April-June quarter with prices the first three weeks of July, 5¢ above last year at Ft. Worth and 14¢ per cwt. at Kansas City. Stocks in all positions on July 1 of 386 million cwt. were 31 million below a year earlier. Disappearance of 269 million cwt. the first 9 months of the season was 25 million above last year due in part to heavy feeding requirements in the dry areas of the Southern and Central Plains. Exports totaled 51 million cwt. the first three quarters, a gain of 11 million over last season.

SOYBEAN ... prices advanced steadily the third quarter of the season -- gaining around 5¢ per bushel. July prices averaged 12¢ per bushel above a year ago. Strengthening factors were the continued good export demand for both soybeans and soybean meal, heavy crushings and some fear of drought in June and part of July. Stocks of soybeans on July 1 totaled 138 million bushels -- 14 million less than a year earlier. A record of 365 million bushels were crushed the first 9 months -- 26 million more than a year earlier. Exports of 146 million were 16 million above the comparable months of 1961-62.

FLAXSEED ... prices drifted lower the last quarter of the season and in July averaged 22¢ per bushel under July 1962. Domestic supplies of flaxseed for 1963-64 amount to 39 million bushels -- 3.6 million more than for 1962-63. Carryover stocks of 8 million were more than double last year. The current crop, estimated at 31 million is down by around 1 million bushels. Disappearance last season of 27 million was up due both to larger crushings and exports. Crushings of 21 million were 2 million larger while exports of 4.5 million were 3 million more.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports and quantity of wheat, rye, soybeans, and flaxseed processed from Census Bureau; and alcohol usage from Internal Revenue Service. April-June 1963 data partly estimated.

GRAINS: MONTHLY AVERAGE CASH PRICES

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

5/ July estimate.

Flaxseed	7,023	5,395	914	6/	4,929	0

1/ Includes stocks sold but not delivered.

2/ Includes both purchase agreements and quantities put under loan.

3/ Reported as of June 30, 1963. Does not include the following quantities of grain outstanding under the 1962-crop price support and resale programs: Wheat 48,249,558 bu.; rye 546,481 bu.; corn 573,304,975 bu.; oats 19,161,890 bu.; barley 19,251,701 bu.; grain sorghum 7,366,521 cwt.; soybeans 28,502,050 bu.; and flaxseed 739,346 bushels.

4/ Total deliveries reported through June 30, 1963. May not include all grains delivered from 1961 resale program and does not include following quantities of grains reported outstanding under resale loans as of June 30, 1963: Wheat 7,742,755 bu.; corn 152,559,239 bu.; oats 5,369,161 bu.; barley 3,689,366 bu.; grain sorghum 3,449,804 cwt.; and soybeans 4,086,744 bushels.

5/ The principal deliveries from the 1962 corn support program will be made after July 31, the date when loans mature. Therefore, July 1 inventory includes only a small quantity of take-over from the current crop.

6/ Less than 500 bushels.

WINTER WHEAT UP - OTHER GRAINS DOWN

Winter wheat prices turned upward during the week ended August 1. Most other cash grains lost ground, with spring wheat, corn, soybeans, and flaxseed leading the downswing.

Winter wheat advanced 2-6¢ per bushel, with good demand for light receipts. Cash prices were generally below loan, and country selling was slow. Domestic and export flour bookings helped support the spot wheat market. Spring wheat prices dropped 3-10¢ per bushel in a further adjustment to new-crop supplies at Minneapolis, but durum held steady in a slow market. White wheat held steady in the Pacific Northwest as marketings remained light despite increased harvest activity. Rye weakened slightly as new-crop offerings picked up and mills were not very aggressive at Minneapolis.

Corn lost around 2-6¢ per bushel at most markets but finished only slightly weaker at Chicago where light offerings found continued good demand from processors and feeders. Prices at other markets were depressed by favorable weather conditions and new-crop prospects. Oats weakened a little, mostly in sympathy with the loss in corn. Harvesting neared completion in the Midwest, but receipts were numerous. Barley markets were weak, with malting types off 4-8¢ on increased new-crop receipts at Minneapolis. Grain sorghum lost 4¢ per cwt. behind slow demand at Kansas City but went up 3¢ on good demand at Ft. Worth.

Soybean prices dropped 5-7¢ per bushel. Exports continued ahead of last year, but continued favorable weather and crop reports were depressing factors on the spot market. Also, more soybeans appeared to be offered from the country this week. Flaxseed lost 5¢ in Minneapolis.

PUBLIC HEARINGS ON PROPOSED CHANGES IN U. S. WHEAT STANDARDS ... have been scheduled for October 1 at Kansas City, Mo., October 4 at Minneapolis, Minn., October 8 at Portland, Ore., and October 11 at Toledo, Ohio. Proposed changes would: (1) Provide maximum limits in the numerical grades for total defects, such as damaged kernels, foreign material, and shrunken and broken kernels, as well as lower the limits of shrunken and broken kernels; (2) Express dockage (material other than wheat which is removed readily by cleaning) by whole and half percent, instead of whole percent as at present; (3) Place wheat with more than 13.5 percent moisture in the "tough" category; (4) Recognize higher than normal test weights per bushel by providing for a special grade, "heavy," for all classes of wheat of grades No. 1, 2, and 3; (5) Discontinue the smut dockage method for appraising the quantity of smut in a lot of wheat; (6) Eliminate subclasses Red Winter Wheat and Western Red Wheat in the class Soft Red Winter Wheat; and (7) Change the subclass Western White Wheat in the class White Wheat to Mixed White Wheat. Interested persons are invited to attend the hearings or to send their comments on the proposals to the Director, Grain Division, Agricultural Marketing Service, Washington, D. C. 20250, by October 31. Copies of the proposed standards may be obtained upon request to the same address.

COUNTY PRICE-SUPPORT RATES FOR 1963-CROP CORN AND SOYBEANS ... were announced this week. Rates are based on national average support prices of \$1.25 per bushel for corn and \$2.25 per bushel for soybeans. The 1963 total support price for corn represents an average of \$1.07 per bushel through loans and purchase agreements plus 18¢ per bushel through payments-in-kind. Corn loans and purchase agreements will be available from harvest time through May 31, 1964 in most areas. Loans will mature in most areas on July 31, 1964. Soybean loans and purchase agreements will be available from harvest through January 31, 1964, but the maturity date for soybean loans has been changed to July 31, 1964. Loan maturity date was May 31 in previous years.

Grains: Export prices basis prompt or 30-day shipment, August 1, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

1/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

GRAIN MARKETS MIXED

Cash grain markets showed a mixed price trend for the week ended August 8. Winter wheat, corn, and soybean prices worked higher, while spring wheat continued to decline. Other grains closed steady to no more than a couple of cents higher or lower.

Winter wheat was unchanged to 2¢ per bushel higher in the hard wheat area and 3-9¢ higher in the soft wheat area. Hard wheat offerings were rather light, but mills appeared to be well stocked and exporters were not too active. Both mills and exporters, however, were reported to be showing more interest. Red wheat drew support from rapidly dwindling new-crop arrivals. Spring wheat harvesting was active and fairly large receipts at Minneapolis saw prices adjusted 1-3¢ downward on spring and as much as 7¢ on durum. Sales of spring wheat flour improved, but durum buying was discouraged by the very light sales of semolina. White wheat held firm in the Pacific Northwest. Rye edged up 2¢ at Minneapolis as lighter receipts found good demand from buyers covering part of recent substantial rye flour sales.

Corn finished mostly around 2-4¢ per bushel higher as supplies dwindled following the recent price decline. Demand was good for light offerings. The 1963 corn crop, meanwhile, made good progress. Oats fluctuated within a narrow range and closed about unchanged. Harvesting neared completion, and spot offerings found ready takers. Barley prices weakened under harvest pressure, with lower qualities off 2-3¢ per bushel in some markets. Grain sorghum prices declined 2¢ per cwt. in Kansas City but went up 2¢ in Ft. Worth. Light offerings found good demand, but active harvesting was a weakening factor.

Spot soybean prices followed wide sweeps in the futures market but closed around 1-2¢ per bushel higher. Trade interest centered mainly on statistical analyses of exports, supply possibilities for the balance of the crop year, and prospects for the new crop. Progress of the new crop remained slightly ahead of normal in the main Soybean Belt where about half of the crop was reported setting pods. Flaxseed held steady at Minneapolis.

EXPORT GRAIN INSPECTION CERTIFICATES WILL SHOW MORE INFORMATION ... as a result of changes made in regulations under the U. S. Grain Standards Act. Changes, which become effective September 9, 1963, standardize information on the certificates, and require more complete information, including the test weight per bushel, moisture content, and other commonly-recognized "factors." Until now, showing of "factor" information has not been required for export shipments of most grains. Inclusion of such information on export certificates will help improve trade communications with foreign buyers of U. S. grain. Regulations under the U. S. Grain Standards Act were amended after careful consideration and consultation with the grain trade. Complete text of the amendments to the regulations will be printed in the Federal Register of August 9. Copies are available from the Inspection Branch, Grain Division, Agricultural Marketing Service, U. S. Department of Agriculture, Washington, D. C. 20250 -- or from field offices of the Inspection Branch.

^{1/} Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Volume 11 No. 33

Washington 25, D. C.

August 16, 1963

GRAIN MARKETS UNSETTLED

Cash grain prices covered wide swings and closed the week ending August 15 on a mixed note. Local supply and demand conditions at the various markets, crop and weather reports, and statistical interpretations were to some extent unsettling factors.

Winter wheat held firm in the hard wheat area as limited offerings found ready outlets in both mills and exporters. Red wheat prices softened despite rapidly dwindling new-crop offerings. Spring wheat prices ranged from 1¢ per bushel lower to 3¢ higher in Minneapolis and finished strong with broad demand. Durum, however, lost 5-9¢ under pressure from heavy new-crop marketings and buyer resistance to current quality. White wheat held firm in the Pacific Northwest, supported by export bookings. Rye fluctuated slightly but closed unchanged in quiet trading at Minneapolis.

Corn prices were mixed but closed not more than 1 or 2¢ per bushel higher or lower for the period. Moderate offerings found good demand at some markets, while light receipts met rather indifferent interest elsewhere. Favorable progress of 1963's larger crop had an unsettling influence. Oats were not much changed with a good demand for the rather liberal supply. Barley weakened as offerings outran demand. Grain sorghum markets were mixed -- down 5¢ per cwt. behind slow demand at Kansas City but up 2¢ on good demand for new-crop receipts at Ft. Worth.

Soybean prices swung back and forth with the futures market but closed on the weak side. Weekly export figures were encouraging, but the forecast of a record 723-million-bushel crop this year proved a depressing influence. Flaxseed lost 5¢ per bushel in Minneapolis where harvest pressure increased.

GRAINS INSPECTED FOR EXPORT ... during July totaled nearly 112 million bushels. This was about a half million bushels more than the previous month and 12 percent more than a year earlier. July inspections brought the total since the first of January to almost 785 million bushels -- about 4 percent less than the same period a year earlier. Wheat and corn accounted for 46 percent and 31 percent, respectively, of the total July inspections, while soybeans comprised another 12 percent. More than half of the grains inspected for export in July were shipped through Gulf ports. About a fourth were exported from Great Lakes ports via the St. Lawrence Seaway. (Details in table on page 12.)

CCC-OWNED FLAXSEED TO BE OFFERED FOR EXPORT SALE ... beginning around the middle of August. Moderate quantities of CCC-owned flaxseed will be offered for sale periodically on a competitive bid basis. Under terms of the sales announcement, buyers will be required to export either the flaxseed or the equivalent in linseed oil in terms of 19 pounds of oil for each net bushel of flaxseed purchased. Exports are to be within 120 days from the date of sale of the flaxseed. Terms and conditions of sales announcement and offers to sell flaxseed for export will be issued by the Minneapolis and Portland ASCS Grain Merchandising Offices.

FOOD FOR PEACE AUTHORIZATIONS ISSUED TO INDIA ... recently will finance the purchase of about 1 million metric tons of wheat from U. S. suppliers under Title I of Public Law 480. Sales contracts made between August 16 and December 31 will be eligible for financing. Shipments may be made between August 16, 1963 and January 31, 1964. Purchases will be made by the India Supply Mission in Washington, D. C.

Grains: Export prices basis prompt or 30-day shipment, August 15, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

MOST GRAINS ADVANCE

Advancing prices were the rule in most cash grain markets during the week ended August 22. Spring wheat, rye, and corn led the upturn. Flaxseed, however, was independently lower.

Hard winter wheat closed firm to slightly higher, but red winter markets had a weak tone. Selling by southwestern farmers and country elevators remained slow, and light offerings found brisk competition. Spring wheat advanced 3-5¢ per bushel and durum went up 6-10¢ at Minneapolis. Mill buyers and exporters provided ready outlets for smaller receipts of spring wheat, while heavy sales of Semolina spurred durum buying. White wheat held firm in the Pacific Northwest where offerings were light and export demand continued active. Rye gained 6¢ on the Minneapolis cash market, reflecting Chicago's higher futures and stronger prices at Winnipeg.

Spot corn prices finished mostly 2-4¢ per bushel higher. Upturns were generally attributed to rapidly dwindling offerings and good buying interest. Prospects for the new crop remained favorable over most of the Corn Belt and progress continued ahead of normal. Oats looked firm or a little higher behind fairly good demand. Barley held firm, with some of the lower qualities up 4¢ at Minneapolis. Receipts were lighter and generally well taken. Grain sorghum edged up 2¢ per cwt. with new-crop offerings finding a ready home.

Soybeans held relatively stable during the week but closed on a firm note. Support stemmed from stronger soybean meal prices, continued heavy export inspections, and July crushings of 38.2 million bushels which were about 3 1/2 million bushels larger than a year ago. Crop prospects, on the other hand remained favorable in most producing areas except eastern Kansas, Nebraska, and Arkansas where moisture is short. Flaxseed lost 5¢ in dull trading in Minneapolis.

Grains - amount under price support	12

NEW-CROP WHEAT PUT UNDER PRICE SUPPORT ... through July 31 totaled 43.2 million bushels -- the smallest quantity under support at the end of July since 1957. A year earlier 72.8 million bushels of 1962-crop wheat had been put under support through July, and two years ago nearly 129.9 million bushels of 1961-crop wheat were under support at the end of July. Of the 43.2 million bushels of 1963-crop wheat put under price support through July 31 this year, 40 million bushels were warehouse-stored, 3.1 million bushels were farm-stored, and a little over 22,000 bushels were under purchase agreements. During July farmers put almost 34.6 million bushels of 1963-crop wheat under support. This compares with nearly 60 million bushels of 1962-crop wheat put under support during July a year ago. (See pages 10-12 for additional price support details.)

PRICE SUPPORT REQUIREMENTS FOR 1963-CROP LIGHT-WEIGHT WHEAT AND BARLEY ... have been relaxed because rust infestation and weather conditions in northwestern States are resulting in production of a higher percentage of light-test wheat and barley than usual. Price support requirements were relaxed to include light-weight wheat and barley which otherwise would not be eligible for price support. Lighter weight wheat included under the relaxed provisions will be wheat grading "Sample" on the factor of test weight only, but no wheat testing less than 40 pounds per bushel will be eligible for support. All barley grading No. 5, including Western barley with a test weight of not less than 36 pounds per bushel, will be eligible for price support.

SALE OF CCC WHEAT TO FEED NEEDY CHILDREN IN ITALY ... was announced recently. Sale of 2,020,884 bushels of wheat to the government of Italy was made under the Commodity Credit Corporation Charter Act and the Agricultural Act of 1949, as amended. This authority provides for sales, at less than prevailing export prices of agricultural commodities for specified uses such as feeding needy children or starting and maintaining school lunch programs in foreign countries. This wheat must be used exclusively for the stated purpose to assure that sales to Italy through normal commercial channels will not be replaced.

Grains: Export prices basis prompt or 30-day shipment, August 22, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

Simple average of daily closing prices.

Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

GRAIN MARKET SHOWS MIXED TREND

Cash grain price trends were mixed but net changes failed to show any set pattern during the week ended August 29. Prices of most grains were down at some markets but up at others.

Winter wheat held firm in the hard wheat area but weakened in the soft wheat area. Limited offerings of hard wheat continued to find good domestic and export demand. Weakness in red wheat reflected softer futures and sizable stocks at Chicago. Spring wheat advanced 3-4¢ per bushel but durum lost 3¢ at Minneapolis. Spring wheat buying was spurred by light cash receipts. White wheat weakened behind slower export demand in the Pacific Northwest. Softness in rye was due for the most part to lack of export trade.

Spot corn finished very irregular. Prices dropped 4-9¢ per bushel at Kansas City as increased offerings found demand lagging. Omaha and Minneapolis registered some weakness, but most other markets held firm with good demand for light offerings. The oncoming crop continued to make good progress in most of the Corn Belt. Oats held firm with good demand for light offerings. Barley finished 1-4¢ per bushel lower in the Midwest but held firm on the Pacific Coast. The steady flow of barley to market since the peak harvest movement put some Midwest buyers on the sideline. Grain sorghum lost 4-5¢ per cwt. at Kansas City but held steady at Ft. Worth. Demand was quiet, and trading was limited.

Soybeans went up 3-4¢ per bushel at Chicago but lost 4¢ at Minneapolis. Prices reacted differently to various trade interpretations of crop and weather news, exports, supply and demand estimates for the balance of this year as well as for the 1963-64 crop, and to fluctuations in the futures market. Flaxseed held steady at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Wheat - quantity ground for flour production, 1956-63	6
Wheat, oats, barley, and rye - U. S. imports by customs districts, July 1962-June 1963	6
Wheat - amount of 1962 crop delivered to CCC, by classes, by States, as of June 30, 1963	7
Feed grains - CCC sales against Certificate Pool	8

MINIMUM CCC SALES PRICE FOR SOYBEANS ... will continue to be through September 1964 the county support rate for 1963-crop No. 2 soybeans plus 19¢ per bushel. Prior to this week's announcement, the current minimum sales price would have expired September 30, 1963. Current minimum sales price will continue to be applicable to any resealed 1961-crop soybeans or 1962-crop soybeans acquired under the price support operation and to any 1963-crop soybeans which may be acquired later in the 1963-64 marketing year. Minimum price applies to soybeans in-store meeting quality standards for the maximum value on the trade buying basis (substantially No. 1 quality) and is subject to trade discounts for lower qualities. Value of paid-in freight also will be added to the price as applicable. The 19¢ markup reflects (1) an adjustment factor to compensate for the difference in premiums and discounts under the loan program and under the trade buying basis; (2) load-in charges of 5¢ per bushel; and (3) carrying charges. Actual sales price under this week's announcement will be the higher of the market price or the computed minimum price. Purpose of the announcement at this time, USDA officials said, is to help assure price stability preliminary to and during the heavy marketing season this fall and to permit producers and tradesmen to continue to conduct normal marketing operations with knowledge of CCC pricing objectives.

Grains: Export prices basis prompt or 30-day shipment, August 29, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/ Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum 2/
			--Dollars--		
Baltimore	No. 2 Red Winter ...	1.92	1.46	2.79	1.18
Gulf	No. 1 Hard Winter:

^{1/} Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

MOST GRAINS STRENGTHEN - SOYBEANS WEAKEN

Prices of most grains developed a stronger trend but soybeans showed some weakness during the holiday-shortened week ended September 5. Trading was limited in many cases by light offerings.

Winter wheat closed unchanged to as much as 7¢ per bushel higher. Domestic and export demand was not overly aggressive but readily absorbed relatively light offerings from primary sources. Strength in the futures market and wet weather trouble with the European wheat crop also provided some support for cash wheat. Spring wheat advanced 2-4¢ at Minneapolis, generally reflecting the higher basic price at that market. Durum, on the other hand, held steady. Spring wheat receipts dropped sharply. Demand was best for the lower proteins. White wheat held firm in the Pacific Northwest where exporters readily absorbed moderate offerings from the country. Rye held steady at Minneapolis, supported to some extent by trade anticipation of export business which so far has been rather disappointing.

Spot corn prices held firm at most markets, with closing quotations at or near 5-year highs. There was no question about demand -- domestic or export. It was a matter of a tight "free" supplies. However, favorable weather news and continued prospects for a big crop still lurked in the background. Oats firmed up a cent or two, reflecting good demand for light offerings and general strength in all feed grains. The barley market improved slightly on lighter receipts at Minneapolis, advancing 2¢. However, prices were unchanged at most other markets and declined 1-2¢ behind lighter export trade at Portland. Grain sorghum prices edged up 1-3¢ per cwt. at Kansas City and 1¢ at Ft. Worth as increased offerings from the new crop stimulated demand.

Soybeans lost 4¢ per bushel at Minneapolis and 2¢ at Chicago, influenced mainly by favorable weather and crop news. Flaxseed held steady in Minneapolis.

CANADIAN CARRYOVER STOCKS OF GRAIN ... in all positions on July 31 totaled an estimated 740.2 million bushels, according to the Dominion Bureau of Statistics. This is 38 percent above the previous year's 537-million bushel carryover but 11 percent below the 10-year (1953-62) average of 828 million bushels. Stocks in all positions on July 31 this year, in million bushels, with last year's totals in parentheses, were estimated as follows: Wheat 490.7 (391.1); oats 151.4 (79.1); barley 89.7 (57.8); rye 4.2 (3.8); and flaxseed 4.3 (5.3).

Grains: Export prices basis prompt or 30-day shipment, September 5, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Aug. 1963	July 1963	June 1963	Aug. 1962
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.2	8.9	9.0	8.1
Value from bushel of soybeans 1/	Dollars	0.88	0.95	0.96	0.89
Soybean Meal, 44%:					
Bulk price at Decatur	Dollars per ton	75.30	72.10	70.40	70.05
Value from bushel of soybeans 1/	Dollars	1.77	1.69	1.65	1.65
Value of oil and meal from bushel of					
soybeans 1/	Dollars	2.65	2.64	2.61	2.54
Market price of No. 1 yellow soybeans					
at Illinois points	Dollars per bu.	2.56	2.56	2.57	2.42
Spread between soybean price and value					
of oil and meal	Cents	9	8	4	12

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.0 pounds of meal for 1962-63.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

GRAIN MARKET SHOWS MIXED TREND

A mixed price trend dominated the cash grain market at the close of the week ending September 12. Wheat, rye, corn, and barley were higher; oats showed little change; and grain sorghum, soybeans and flaxseed were lower.

Hard winter wheat finished on a firm note, while red wheat advanced 4-5¢ per bushel. Strength in red wheat was attributed to intensified export interest generated by a wet harvest in Europe. Country movement of southwest hard wheat remained light, but domestic demand was on the quiet side. Spring wheat held firm at Minneapolis, but durum was off 2-4¢. Mill buyers were in the market for enough spring wheat to absorb daily offerings, and terminal elevators readily took any additional offerings. Durum receipts were up slightly, but flour sales were at a standstill. Pacific Coast white wheat prices edged up slightly behind more active demand, particularly from exporters. Rye advanced 7¢ per bushel at Minneapolis. Major factors were slow selling by producers of this year's smaller crop, strength at Winnipeg, and export interest resulting from unfavorable weather for some foreign crops.

Cash corn prices closed 1-3¢ per bushel higher. Continued good domestic and export demand for limited offerings of "free" corn and a late-week threat of frost in some sections helped temper the weakening influence of a record crop forecast and country bookings of new-crop corn scheduled for imminent shipment out of Indiana. Oats showed little or no change. Demand was good, but trading was limited by scarce offerings. Barley advanced 4-6¢ at Minneapolis and 1-2¢ elsewhere. Demand was selective but readily absorbed light offerings. Grain sorghum prices lost 2-5¢ per cwt. under new-crop harvest pressure.

PRICE SUPPORT REQUIREMENTS ON HIGH DAMAGE WHEAT AND BARLEY ... from the 1963 crops have been relaxed because heavy rains have caused sprouting in unharvested wheat and barley in some Northwestern States. Wheat and barley grading "Sample" on the basis of total damage (other than heat damage) now will be eligible for price support at appropriate discounts.

GRAIN EXPORT INSPECTIONS ... during August totaled 93.4 million bushels, 18.5 million less than in July and 4.2 million less than in August 1962. August inspections brought the total since January 1 to 878.1 million bushels -- about 39.3 million bushels below the same period a year earlier. The 45.4 million bushels of wheat inspected for export during August accounted for nearly half of the month's total. Other inspections included 22.2 million bushels of corn, 12.7 million bushels of soybeans, 6 million bushels of grain sorghum, nearly 5.5 million bushels of barley, and lesser amounts of oats, rye, and flaxseed. Of the 93.4 million bushels of grain inspected for export during August, 52.5 million were shipped from Gulf ports, almost 23.3 million from Great Lakes ports, 13.2 million from Pacific ports, and 4.4 million from Atlantic Coast ports. Compared to the previous month, inspections were off 16.4 million bushels in the Gulf and 5.9 million in the lake ports. However, export inspections were up 3.5 million bushels on the Pacific Coast and 301,000 bushels on the Atlantic Coast. (See details in table on page 12.)

U. S. GRAIN INSPECTED FOR EXPORT FROM CANADIAN PORTS ... during August totaled 14.8 million bushels. Nearly half of this was corn, but wheat and barley each accounted for 2.6 million bushels of the total. So far during the current St. Lawrence Seaway shipping season, a little more than 62 million bushels of U. S. grains have been inspected for export from Canadian ports. This compares with about 37 million bushels inspected during the same April-August period a year earlier. (See details in table on page 13.)

Grains: Export prices basis prompt or 30-day shipment, September 12, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
--Dollars--

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

MARKET REPORT - URGENT
Grain Market News

USDA, Economic Research Service
11-9-61 W. R. Askew
4-F-SGR Econ. & Stat. Anal. Div.

(Continued from page 1)

Soybeans closed on a mixed note. Prices were weak in Chicago and 2-4¢ per bushel lower at Illinois country points but 6¢ higher in Minneapolis. Demand was good for light offerings. While the August 1 forecast called for a record 728-million-bushel crop, it was less than had been anticipated by many traders and ended up having a bullish effect on the market. Frost warnings late in the week also had a strengthening influence. However, nearness of the new crop provided a weaker undertone. Flaxseed was under harvest pressure and lost 5¢ at Minneapolis.

Volume 11 No. 38

Washington, D. C. 20250

September 20, 1963

GRAIN PRICES GENERALLY ADVANCE

Most grain prices advanced during the week ended September 19. Wheat prices generally advanced 5-8¢ per bushel due largely to heavy sales of wheat by Canada to the Soviet Union and to reports of heavy damage to the current crop in many areas of Europe. This is expected to result in increased demand for wheat from this country. Corn prices declined at most markets with increased marketings of the new crop.

Hard winter wheat advanced 4-5¢ per bushel reflecting light receipts and improved demand. Red wheat gained 8¢ with a strong demand for light offerings. Spring wheat went up 5¢ per bushel at Minneapolis as country selling continued light and both export and domestic demand was good. Durum wheat climbed 9-10¢ largely due to light offerings. White wheat closed 6¢ higher in the Pacific Northwest as export demand became active and farm marketings continued to lag. Rye advanced 12-13¢ per bushel reflecting the higher wheat market anticipated exports.

Corn prices closed about unchanged at Chicago but lost 3-5¢ per bushel at most other Midwest markets. Large export commitments and good local processor demand provided strength at the Chicago market. However, with increased receipts and prospects for early marketing of the record crop, prices dropped at most other points. Oats turned stronger and gained 1¢ per bushel. Barley advanced 3-6¢ as receipts were smaller and maltsters and dealers were active buyers. Grain sorghum edged up 1-3¢ per cwt. with heavy rains halting harvest in many areas while bidding was fairly active.

Soybeans advanced 2¢ per bushel reflecting in part better oil prices. Chicago received the first new-crop soybeans from the regular production area. The market was sensitive to any news and fluctuated rather widely during the week. Flaxseed prices were unchanged at Minneapolis.

- 2 -

WHEAT SUPPLIES IN CANADA ... for 1963-64 are the largest of record and totaled 1,183 million bushels. These compare with 957 million a year ago and 891 million two years ago following the near crop failure. Supplies for the five years prior to that averaged 1,095 million bushels. The 1963 crop was estimated at 694 million which compares with 566 million in 1962 and 283 million in 1961. Exports of wheat and flour in grain equivalent totaled 332 million bushels for the season ending July 31, a drop of 26 million from the previous season. Supplies of barley for 1963-64 totaled 294 million, an increase of 70 million over 1962-63 supplies. A larger carryover offset the drop in the oats crop with the result that supplies for 1963-64 at 593 million are 20 million above last year. Supplies of rye and flaxseed for 1963-64 are both above those of a year ago. Exports of oats last season increased sharply while barley exports were less than a third the previous season. (See page 7 for more details).

WHEAT PUT UNDER PRICE SUPPORT ... through August 31 totaled 79.4 million bushels, a drop of 21 million from the same period last season. The higher prices this season were important factors causing the drop in loan activity. A little more rye and barley had been put under price support this season than a year earlier but the quantity of oats put under was down. A total of 5.3 million cwt. of grain sorghum had been put under support through August as against 8.7 million by August 31, 1962. (See pages 10-12 for additional details).

Grains: Export prices basis prompt or 30-day shipment, September 19, 1963

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

GRAIN MARKETS CONTINUE STRONG

Cash grain markets continued to show strength for the third week and prices were mostly unchanged to higher for the week ended September 26. Corn was weak at some markets but continued strong at Chicago.

Hard winter wheat was mostly unchanged to 3¢ per bushel higher as exporters, mills, and storage interests stepped up buying. Most of the gain was in ordinary proteins. Red wheat generally advanced 5¢ reflecting aggressive mill and elevator bids. Farmers and other holders of wheat offered sparingly in anticipation of selling later at higher values. Spring wheat advanced 1¢ with mills active. Buyers not able to meet requirements went to CCC for additional supplies. Durum wheat gained 2¢ with offerings readily absorbed. In the Pacific Northwest prices continued to climb as exporters were pushing prices and mills followed suit. No. 1 soft white jumped 9¢ at Portland. Rye gained 2¢ at Minneapolis reflecting light receipts and strength at Winnipeg.

Corn prices closed on a weak tone due in part to failure of earlier hopes for large export sales and to limited demand at current prices. The market was erratic during most of the week and price changes were mixed. Corn was 1¢ lower to 4¢ higher at Kansas City, 1-2¢ lower at Omaha, but 1-2¢ higher at Chicago. Oats went up 1-2¢ as small offerings found ready takers. Barley advanced 2-4¢ at Minneapolis and 5¢ at Portland with the biggest gain in feeding barley. Grain sorghum gained 1-3¢ per cwt. as substantial offerings met a brisk demand.

Soybean markets surged upward with gains of 8¢ per bushel for the week. Strength stemmed in part from higher oil prices but also from a lack of offerings. Flaxseed gained 10¢ during the week in Minneapolis.

WHEAT SUPPLIES ... in Canada and United States on September 1 for export or carryover totaled 2,600 million bushels. These are 100 million more than a year ago but slightly below two years ago. The larger supplies this year reflect mainly the sharp increase in the 1963 Canadian wheat crop. Carryover stocks on August 1 were also larger than a year earlier. Canadian supplies for 1963-64 at 1,183 million are nearly 300 million above two years ago. Total U. S. supplies for 1963-64, estimated at 2,323 million, are 90 million below the previous season and 320 million below supplies for 1961-62. Exports of wheat and flour in grain equivalent totaled about 165 million July through August from United States and Canada. This is about 25 million above the same months last year but is 17 million below the same months of 1961.

SOYBEAN MARGINS ... were small last season reflecting the generally low prices for oil. Soybean oil prices were under 9¢ per pound most of the season while prices for the 1961-62 season averaged 9.5¢ and for 1960-61 at 11.2¢ per pound. Offsetting in part the low oil prices have been somewhat higher prices for soybean meal. Bulk prices of 44% soybean meal, Decatur basis, averaged \$71.40 per ton, an increase of \$8.00 over the average for 1961-62. Using out-turns based on Census reports the value of oil from a bushel of soybeans was 94¢ - a drop of 10¢ from the previous year and nearly 30¢ below 1960-61. On the same basis, the value of the meal from a bushel of soybeans was \$1.68 -- an increase of 19¢ over the previous season and 26¢ above 1960-61. The value of the meal has averaged above that for oil in each year since 1956-57.

WHEAT VARIETIES NAMED ... which are undesirable because of inferior milling or baking qualities will be discounted 20¢ per bushel in price-support rates on the 1964 wheat crop. The list includes Lathrop variety in addition to the 37 listed for the 1963 support program.

Grains: Export prices basis prompt or 30-day shipment, September 26, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Sept. : 1963 2/	Aug. : 1963	July : 1963	Sept. : 1962
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.3	8.2	8.9	8.0
Value from bushel of soybeans 1/.....	Dollars	0.89	0.88	0.95	0.88
Soybean Meal, 44%:					
Bulk price at Decatur	Dollars per ton	75.30	75.30	72.10	75.85
Value from bushel of soybeans 1/.....	Dollars	1.77	1.77	1.69	1.78
Value of oil and meal from bushel of soybeans 1/.....	Dollars	2.66	2.65	2.64	2.66
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.58	2.56	2.56	2.33
Spread between soybean price and value of oil and meal	Cents	8	9	8	33

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.0 pounds of meal for 1962-63. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans	Flaxseed
	1962-63	1961-62 : 1963-64 : 1962-63
	-- 1,000 bushels --	
Carryover 1/.....	57,565	5,994 : 8,302 : 3,608

1/ Number of inspections converted to bushels on the basis of 1,900 bushels per carlot, actual bushels per cargo, and the average number of bushels per trucklot at each market. (The average trucklot among markets varied from 150 to 1,030 bushels).

NOTE: The breakdown of wheat receipts by classes for July and August 1963 is not available due to a change in the method of reporting. Beginning with September, 1963, a breakdown by classes will be available.

Volume 11 No. 70

Washington, D. C. 20250

October 4, 1963

GRAIN MARKETS GENERALLY HIGHER

Cash grain markets generally continued strong during the week ended October 3, with wheat leading the advance. Corn, rye, and wheat in the Pacific Northwest were the exceptions with prices below a week ago. Strength stemmed mainly from hopes for large export trade with the Soviet Bloc countries.

Hard winter wheat gained 1-3¢ per bushel with the higher advance in export grades. Demand was good, but offerings were scarce as farmers and country elevators were holding back supplies. Red wheat advanced 5¢ as supplies remained limited. Spring wheat went up 1-2¢ per bushel with good demand from mills for spot offerings. Heavy grindings prompted their buyers to seek additional supplies. Demand improved for durum wheat, and prices went up 3¢ per bushel. Wheat prices in the Pacific Northwest dropped 4-5¢ for soft white despite heavy export trade and producer resistance to the weaker prices. Rye dropped 6¢ per bushel as export demand failed to materialize. Prices fluctuated rather widely.

Corn prices were generally unchanged to 4¢ lower as the weather was favorable for drying the crop and harvesting of the record production is expected shortly. Corn arrivals were meager with a few trucklots of new-crop arriving at Chicago. Demand was generally good at the lower levels. Oats followed the general trend of corn and eased off around 1¢ per bushel. Barley markets held steady at most points except Portland where prices were 1-2¢ per bushel below a week ago. Grain sorghum went up 1-2¢ per cwt. under strong demand from all interests.

Soybean markets strengthened with buyers actively seeking supplies. Most of the receipts were applied against contracts and offerings were limited. Prices generally closed 2-4¢ above a week ago. Flaxseed advanced 2¢ with demand only fair.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

WHEAT AND SOYBEAN PRICES ADVANCE

Wheat and soybean markets strengthened during the week ended October 10. The President's announcement regarding the sale of U. S. wheat to the Soviet Union was the strengthening factor. Corn prices generally declined with increased new crop receipts. Other grains followed a mixed trend.

Hard winter wheat advanced 3-4¢ per bushel as all available offerings were readily taken. Supplies were limited by the tight holding on the part of farmers and country elevators. Red winter wheat gained 4¢ per bushel due to the strong export demand. Spring wheat went up 2-3¢ per bushel as receipts were too small to satisfy buyer needs. CCC reported sales of wheat to fill part of the need. Mill demand was good even though flour business was slow. Durum wheat advanced 5¢ per bushel. White wheat gained 2-3¢ due mainly to the strong export demand. Rye went up 3¢ per bushel along with wheat and the hope of later export business.

Corn markets weakened as weather continued favorable for drying the new record crop. The new crop was estimated at 4,009 million bushels, 10 percent above 1962 and 13 percent above average. Prices dropped 7¢ per bushel at Chicago, 4-5¢ at Minneapolis, and lesser amounts at other points. Oats were steady in light trading. Barley dropped 4-6¢ for the feeding grades at Minneapolis due in part to excess offerings. Top quality malting sold about unchanged. Grain sorghum advanced 1¢ per cwt. with demand good for nearby offerings.

Soybeans went up 12-13¢ per bushel despite the fact that farmers were actively harvesting a record crop estimated at 727 million bushels. This is 8 percent above last year and 28 percent above average. Demand from both domestic and export interests was active, but offerings were light. Flaxseed advanced 5¢ in very quiet trading at Minneapolis.

OFFERS TO PROCESS BULGUR ... from CCC-owned wheat were requested by the Department on October 10. Offers were requested for processing about 10,696,400 pounds of bulgur from 205,014 bushels of hard winter wheat for donation overseas through an Agency for International Development. This request brought the total to 326,758,500 pounds of bulgur from 6,235,695 bushels of CCC-owned wheat. The Department also requested offers for sale to CCC of about 26,360,128 pounds of bulgur from privately owned wheat for donation overseas through voluntary agencies and domestic donation. So far a total of 170,184,156 pounds have been obtained for donation under the program announced February 21.

Pacific Northwest ..	No. 1 Western White	2.19	-	-	1.15

1/ Does not include the export payment rate for wheat which on October 10, was 56¢ per bushel for red winter from Baltimore, 56¢ for hard winter from the Gulf and 47¢ for soft white from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports.

Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

1/ Includes about a million bushels of 1963-crop soybeans inspected for export in September.

October 18, 1963

CORN AND SOYBEANS SHARPLY LOWER

Corn and soybean markets reacted to increased harvesting and prices closed sharply lower for the week ended October 17. Oats and grain sorghum were also lower, but wheat was generally unchanged to higher.

Winter wheat went up 1-5¢ per bushel with offerings light as farmers and country elevators showed little inclination to sell on a rising market. Red wheat was at a premium at Chicago with a good export demand. Spring wheat markets continued steady with no change in prices. Demand from mills was strong, but selling continued light. Durum wheat went down 5¢ as export demand failed to materialize. White wheat advanced 2¢, and hard bread wheats gained 5¢ per bushel in the Pacific Northwest. Export sales were low, but prospects looked good. Rye went down 2¢ reflecting the lack of export business.

Corn markets weakened as harvest of the record-breaking crop increased. Demand was good for light offerings, but prices were mostly 5-8¢ per bushel below a week ago. Above-normal temperatures and open skies were general over most of the corn area. Oats declined 1-2¢ due mainly to lower corn prices. Barley receipts were light, and prices were up 2-3¢ per bushel. Grain sorghum prices declined 5¢ per cwt. at Kansas City as harvest made rapid progress but went down only 1¢ at Ft. Worth.

Soybean prices dropped 18-19¢ per bushel at Chicago and Minneapolis as new-crop supplies began arriving in volume. Despite the drop, prices were around 30¢ above a year ago. Harvesting of the new crop made rapid progress with generally nice weather. Flaxseed went down 4¢ as demand was only fair.

Special Features

	<u>Page</u>
Food for Peace Authorizations	2
Grains - export prices at specified points	2
Feed grains - CCC sales against Certificate Pool	6
Wheat and flour - export program rates	6
Wheat - supply and distribution in four exporting countries	7
Corn, grain sorghum, and soybeans - inspections for export by grades, 1962-63	8-9
Corn and grain sorghum - inspections for export by country of destination, 1962-63	10
Soybeans - inspections for export by ports and country of destination, 1962-63	11
Corn and soybeans - inspections for export from Canadian ports, 1962-63 ..	12

PRICING POLICY FOR CCC WHEAT ... was announced for the sale of Commodity Credit Corporation-owned wheat in anticipation of expanded export needs. Within the area from which exports through the Gulf will be drawn, CCC will set minimum prices for wheat at locations closer to port somewhat higher than the statutory minimum at such locations. This price, plus export freight costs to ports, will correspond to the statutory minimum at more distant points from which CCC wheat will be needed plus export freight from such distant points to port. Thus, the cost of CCC wheat to export buyers at Gulf ports will be the same whether the wheat originates close to port or at the farther interior points.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Includes 339,000 bushels of soybeans inspected at Huron, 185,000 bushels at Michigan City, 1,031,000 bushels at Saginaw.

2/ Includes 115,000 bushels inspected at Corpus Christi.

3/ Includes 1,730,000 bushels inspected at other ports.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of the soybeans exported is not shown on the inspection reports, therefore, the quantity of each country may vary from official Census data, which are based on custom declarations.

Washington, D. C. 20250

October 25, 1963

GRAIN MARKET SHOWS MIXED TREND

Cash grain prices closed the week ending October 24 on an uneven note. Some weakness appeared in wheat and corn, but soybeans were not much changed, and most other grains displayed a stronger tendency.

Winter wheat prices were generally unchanged, but the top side of the high protein range was down 4¢ per bushel in Kansas City and red wheat slipped 1-2¢ in Chicago. Offerings were light as farmers maintained a tight holding policy. Demand was fairly good, particularly from exporters. Trade interest centered on negotiations for the sale of U. S. wheat to Russia. Spring wheat held steady at Minneapolis, supported by strong demand and increased flour exports. Durum was steady to 2¢ lower, reflecting slow sales of semolina. White wheat lost 2-3¢ and hard bread wheats were off 4-5¢ in the Pacific Northwest despite moderate export bookings and a stronger holding tendency by farmers. Rye advanced 5¢ behind active demand at Minneapolis.

Corn markets were mixed -- weaker at Chicago and Kansas City but stronger elsewhere. Increased new-crop offerings were absorbed readily. The boxcar shortage still held some trade concern, but most interest was focused on export sales to Hungary and Japan. Oats held firm with light offerings meeting fairly good demand. Barley ranged 1-4¢ higher at the close, supported by active interest in moderately light offerings. Grain sorghum found strong demand and prices held firm.

Soybean prices fluctuated within a narrow range and closed little changed. Harvesting was active, and most new-crop offerings found ready takers. Export sales and the September crushings figure were encouraging to many traders, but uncertainty over the meal market caused some concern. Flaxseed advanced 5¢ in Minneapolis.

Grains - amount under price support	12

PRICE SUPPORT ACTIVITIES ... through September showed that farmers had put 114. million bushels of 1963-crop wheat under price support. This compares with 135.5 million bushels of 1962-crop wheat put under support as of the same date a year earlier. So far this year farmers have put substantially more barley, flaxseed and oats but less corn, rye, grain sorghum, and soybeans under support than they did a year earlier. (See additional price-support details in tables on pages 11 and 12.)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ No program.

NOTE: Farmers also had put 536,162,997 bushels of 1962-crop corn under loan and 55,422,198 bushels under purchase agreements through September 30, 1963. Of these quantities, they had repaid loans on 67,370,512 bushels and delivered 260,470,682 bushels under loan and 17,254,514 bushels under purchase agreements.

Volume 6 No. 4

Washington, D. C. 20250

October 28, 1963

Grain prices followed a mixed course during the July-September quarter but generally closed on a stronger note as a result of increased export demand. Large sales of wheat by Canada and Australia to the Soviet bloc and expected sales by the United States boosted wheat prices sharply late in the period. Soybean prices were firm during the quarter, and advanced early in October to average well above a year earlier. Corn weakened with prospects for a record crop. Other feed grains showed little or no price change during the quarter. At the end of the third week of October prices of most grains except bread wheat, durum wheat, and flaxseed generally averaged above a year ago.

WHEAT ... prices at the farm averaged for the first quarter of the season 20¢ per bushel below a year ago. Prices dropped to a low point the latter part of July, but strengthened thereafter as a result of increased export demand and reports of crop damage in Europe. By the third week of October prices had advanced as much as 30¢ from the low point. Compared to a year earlier, red winter wheat prices were 3-9¢ per bushel higher, but hard winter was 1-11¢ lower, spring wheat 1-13¢ lower, and durum 15¢ lower. Stocks of wheat in all positions October 1 totaled 1.9 billion bushels, 124 million less than a year earlier. Of these, 1.2 billion bushels were either owned by Commodity Credit Corporation or under loan. Farmers put 115 million bushels of 1963-crop wheat under price support through September 30 -- 21 million less than last year and only half as much as two years ago. July-September exports of wheat and flour totaled 177 million bushels, about 30 million more than a year ago. Wheat supplies in Canada for 1963-64 total 1.2 billion bushels as against 957 million for 1962-63. The Western European wheat crop is down 300 million bushels from last year, and quality of the crop is down considerably, too.

RYE ... prices during the first three weeks of October averaged 27¢ per bushel above a year earlier due mainly to improved export inquiry and smaller supplies. U. S. rye production dropped 28 percent, while world production was 15 percent below the 1955-59 average. U. S. stocks of rye on October 1 totaled 23 million bushels compared with 33 million a year earlier. First quarter disappearance of rye reached 13.6 million bushels -- 2.2 million less than last year. Exports of 1.6 million bushels were sharply below the nearly 8 million exported the first quarter last season.

CORN ... prices for July-September at principal markets averaged around 18¢ per bushel above the same months last season. Prices held up well during the first half of October but weakened the third week of the month. A record-breaking crop of over 4 billion bushels was forecast October 1. This is 365 million bushels above last year. Supplies of corn for 1963-64 totaled 5.3 billion bushels, or 21 million more than for 1962-63. Carryover stocks of old corn on October 1 totaled nearly 1.3 billion bushels -- 345 million less than a year earlier. Of these, CCC either owned or had outstanding under loan 1.2 billion bushels, 366 million less than a year ago. Sales of corn by CCC totaled 724 million bushels

last season compared with 914 million a year ago. Disappearance of nearly 4 billion bushels of corn during 1962-63 was about the same as a year earlier. Exports of 392 million were down 24 million from the previous season's record. Wet corn milling reached a record 179 million bushels. The 3.3 billion bushels used for feed were slightly larger than 1961-62. Corn fed per animal unit totaled 19 bushels last season compared with 19.3 the previous season and 16.9 the 1956-60 average.

OATS ... prices at Chicago and Minneapolis for the first quarter and the first three weeks of October averaged 3¢ per bushel above a year ago. Oats stored in all positions October 1 totaled 940 million bushels -- 38 million below last year. July-September disappearance of 313 million was down 17 million from a year ago. Exports of 3 million bushels were sharply below the nearly 12 million exported a year earlier. Canadian supplies of 598 million bushels for 1963-64 are 25 million above last season.

BARLEY ... prices at the farm averaged nearly 4¢ per bushel below a year ago for the first quarter this season. Feeding barley prices at Minneapolis continued below last year in October but choice malting barley and West Coast barley prices averaged above a year earlier. October 1 stocks, at 424 million bushels, were 25 million less than last year. First quarter disappearance of 119 million bushels ran 14 million above a year earlier. Exports of 9.5 million dropped sharply from the 15.8 million exported a year earlier. Alcohol usage was up slightly, but feed consumption dropped 30 percent. Canadian barley supplies for 1963-64 totaled 306 million bushels -- 82 million more than 1962-63.

GRAIN SORGHUM ... prices for July-September averaged 11-12¢ per cwt. above a year ago, reflecting for the most part good domestic demand. Supplies for 1963-64 totaled 661 million cwt. as against 655 million for 1962-63. The October forecast of a 295-million-cwt. crop was 3 percent above last year, but carryover stocks of 366 million were 4 million less. Disappearance of 289 million cwt., mostly for feeding, was down slightly from last year. Exports of 63 million cwt. were up 7 million cwt. CCC grain sorghum sales last season totaled 132 million cwt. -- about 7 million more than the previous season.

SOYBEAN ... prices for July-September averaged 16¢ per bushel above a year earlier, reflecting good demand and smaller supplies. Prices for the first three weeks of October averaged about 34¢ per bushel higher than a year earlier. October carryover stocks totaled only 15 million bushels compared with 58 million a year earlier. With an 8 percent larger record crop of 727 million bushels, supplies for 1963-64 totaled an all-time high of 742 million bushels. Crushings of 474 million bushels last season were 36 million above the previous season. Exports of a record-breaking almost 180 million bushels in 1962-63 topped the previous record in 1961-62 by about 26 million bushels.

FLAXSEED ... prices averaged 24¢ per bushel below a year ago the first quarter of the season, and declined another 9¢ in the first three weeks of October. Stocks on October 1 stood at 36 million bushels -- 9 million more than a year earlier. First quarter crushings reached 3.5 million bushels; exports, 1.1 million.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

DISTRIBUTION

Year and quarter	: Used for seed	: Milled for flour 3/	: Exports grain only	: Feed and residual 4/	: Total	: Distribution - flour in terms of grain	: Domestic : Exported

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

Rye: Supply and distribution, 1957-63

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Mostly quantity fed, but includes oats for oatmeal currently estimated at 44 million bushels annually. Also includes waste, loss, and statistical errors in estimates.

SOYBEANS UP - CORN DOWN

Soybean prices advanced sharply but corn markets turned downward during the week ending October 31. Other cash grains generally ruled firm.

Winter wheat edged up 1-2¢ per bushel behind good demand for light offerings from farmers and country elevators. Exporters were active in both wheat and flour, particularly in the Gulf area. Many traders continued to anticipate a record outgo this year regardless of whether or not sales are made to Russia. Spring wheat held steady but durum lost 3-4¢ at Minneapolis. Light sales of spring wheat by farmers kept mill demand satisfied, while durum found little or no export interest and only light demand from mills. White wheat prices advanced 3-4¢ in the Pacific Northwest where producers remained slow sellers and export inquiry tapered off. Rye moved up a couple of cents at Minneapolis. Strength followed speculative buying in the option market at Chicago that was based on expectations of foreign demand for rye.

Cash corn remained under harvest pressure, and prices slipped 1-4¢ per bushel at principal markets. Buyers were somewhat selective, but most offerings readily found a home. Transportation difficulties and export interest helped temper the downturn. Oats held generally steady in quiet trading. Barley markets were not much changed except for weakness on some of the lower grades at Minneapolis. Grain sorghum prices held firm behind good demand.

Soybean prices advanced 13-14¢ per bushel. Harvesting made rapid progress, but offerings found ready takers. Various trade analyses of the anticipated close balance between supply and demand this season, continued heavy export inspections, reports of poor yields in Arkansas, labor troubles involving Canadian lakers, and trade rumors of soybean and soybean oil export deals with Eastern Europe were major market factors. Flaxseed held steady in extremely light trading at Minneapolis.

CORN INSPECTIONS FOR EXPORT ... during the week ended October 25 totaled 12.4 million bushels -- the largest for any week since last December. This was 9.7 million bushels larger than the previous week's inspections, and ran 6.2 million bushels above the comparable week a year earlier. Export inspections of corn for October 1-25 total nearly 22.4 million bushels, or about 7 million bushels more than the same period a year ago. Of the 12.4 million bushels of corn inspected for export during the week ended October 25, 1963, 3.7 million bushels moved through Great Lakes ports, about 2.2 million from Atlantic ports, 6.2 million from the Gulf, and nearly 262,000 bushels through Pacific ports. Major destinations were Japan and the Netherlands which took 2.8 million and 1.8 million bushels, respectively. More than 800,00 bushels each went to the United Kingdom, West Germany, and Belgium and Luxembourg. Over 400,000 bushels each were inspected for shipment to Ireland and Spain, while lesser amounts went to other countries.

Grains: Export prices basis prompt or 30-day shipment, October 31, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
--Dollars--					
Baltimore	No. 2 Red Winter ...	2.32	1.33	2.94	1.27
Gulf	No. 1 Hard Winter				
	Ordinary protein ..	2.39	1.32	2.95	2.22
	14% protein	2.49	-	-	-
Pacific Northwest ..	No. 1 Western White	2.22	-	-	1.18

1/ Does not include the export payment rate for wheat which on October 31, was 62¢ per bushel for red winter from Baltimore and hard winter from the Gulf and 49¢ for soft white from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Average prices received by farmers, effective parity, and support rates
(Dollars per bushel except grain sorghum per cwt.)

Grains	Average farm price				Effective parity	Av. price as percent of parity	National average price support rate		
	Oct. 15, 1963	Sept. 15, 1963	Oct. 15, 1962	Oct. 15, 1963			1963 crop	1962 crop	1961 crop
Wheat	1.94	1.84	1.97	2.51	77	<u>1/</u>	2.00	2.00	1.79
Corn	1.08	1.21	1.02	1.59	68	<u>1/</u>	1.25	1.20	1.20
Oats	.631	.616	.616	.849	74		.65	.62	.62
Barley	.914	.853	.889	1.25	73	<u>1/</u>	.96	.93	.92
Rye	1.16	1.09	.945	1.42	82		1.07	1.02	1.02
Grain Sorghum	1.73	1.78	1.62	2.49	69	<u>1/</u>	2.00	1.93	1.92
Flaxseed	2.71	2.58	2.79	3.89	70		2.90	2.90	2.80
Soybeans	2.56	2.44	2.23	3.01	85		2.25	2.25	2.30

1/ Includes payment-in-kind rates of 18¢ per bushel for wheat and corn, 14¢ for barley and 29¢ per cwt. for grain sorghum.

Average farm and parity prices from Crop Reporting Board.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Oct. 1963	Sept. 1963	Aug. 1963	Oct. 1962
Soybean Oil:					
Average price at crushing plant	Cents per lb.	9.3	8.4	8.2	8.6
Value from bushel of soybeans <u>1/</u>	Dollars	1.00	0.90	0.88	0.92
Soybean Meal, 44%:					
Bulk price at Decatur	Dollars per ton	73.80	75.10	75.30	69.85
Value from bushel of soybeans <u>1/</u>	Dollars	1.73	1.76	1.77	1.64
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	2.73	2.66	2.65	2.56
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.68	2.58	2.56	2.37
Spread between soybean price and value of oil and meal	Cents	5	8	9	19

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.0 pounds of meal for 1962-63.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

GRAIN MARKETS SHOW MIXED TREND

Trading in cash grains was light and prices closed the week ended November 7 on a mixed note.

Winter wheat generally finished in a firm position, with the most firmness in the red wheat division. Hard wheat sales by the country remained slow as more and more farmers tended to hold their wheat and to defer sales until the new tax year. Continued delay in negotiations of wheat sales to Russia had a bearish influence, but this was partly offset by sustained demand, particularly from exporters. Spring wheat held firm in Minneapolis, supported by small rail receipts. Durum was unchanged with very quiet semolina business. White wheat prices weakened in the Pacific Northwest where exporters were busy filling past commitments and country buying was not being pressed despite the firmer holding tendency of farmers. Rye lost 3¢ per bushel as export sales failed to develop and rye flour business was near a standstill.

Corn prices advanced 1-3¢ per bushel. Harvesting was in full swing in the Corn Belt, and marketings were moderately heavy despite the boxcar shortage. Offerings were readily absorbed, particularly by exporters. Oats showed little or no change in quiet trading. Barley prices were not much changed at most markets but dropped 2-6¢ at Minneapolis where there was a fairly large carry-over of offerings at one time this week. Grain sorghum prices ruled about steady as moderate offerings found ready takers.

Soybeans advanced 4¢ per bushel, stimulated mainly by light offerings and the holding tendency on the part of producers. Considerable trade interest still centered on this season's supply-demand picture. Flaxseed held steady in Minneapolis.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Number of inspections converted to bushels on the basis of 1,900 bushels per carlot, actual bushels per cargo, and the average number of bushels per trucklot at each market. (The average trucklot among markets varied from 150 to 1,030 bushels).

2/ Receipts not available by classes at: Nashville for 46,000 bu. in carlots; Chattanooga for 8,000 bu. in carlots; Kansas City for 2,322,000 bu. in carlots, 40,000 bu. in cargoes, and 158,000 bu. in trucklots; Carthage, Mo. for 129,000 bu. in carlots; Topeka, Kan. for 988,000 bu. in carlots; and Decatur, Ala. for 46,000 bu. in carlots. Therefore, receipts at these markets are not included in the above table.

November 15, 1963

GRAIN MARKETS WEAKEN

Most cash grains found slow trading at slightly weaker to lower prices during the week ended November 14.

Winter wheat markets closed on a soft note. Trading marked time as both buyers and sellers awaited actual sales of wheat and flour to the Soviet bloc before making further commitments. Offerings from the country remained light. There was growing concern over dryness in some of the hard and red wheat areas and over railroad embargoes against moving grain to some East and Gulf Coast ports. Spring wheat lost 5-7¢ per bushel but durum held steady at Minneapolis. Demand for spring wheats was slow, reflecting dull domestic flour business and very little export activity. White wheat showed little change in quiet trading in the Pacific Northwest. Rye lost 4¢ at Minneapolis. Demand fell off, reflecting slow rye flour sales and the approaching end of the St. Lawrence shipping season.

Corn finished 1-3¢ per bushel lower as harvesting made rapid progress and movement to markets was heavy. Oats declined 2-3¢ largely in sympathy with the lower corn market and the slow pace of the feed market. Barley closed unchanged to mostly 2¢ lower despite the fact that light offerings generally limited trading. Grain sorghum prices weakened as offerings increased and demand slacked off.

Soybeans lost 4-5¢ per bushel as late strength attributed to the lower crop estimate failed to offset earlier losses. Trade interpretations of crushings, export figures, and possible oil sales to the Soviet bloc were market factors. Flaxseed held steady in light trading at Minneapolis.

Wheat - supply and distribution, monthly	14
Grains - yield and production, United States	14

WHEAT EXPORTS ... totaled nearly 70 million bushels during October on the basis of inspections for export. While this is somewhat below the record of last May, it is with this exception, the largest of record. Exports of wheat and flour July through October are estimated at 251 million bushels as against 185 million last year. As usual the largest portion of the wheat (grain only) exports was hard winter with nearly 129 million inspected for export during July-October this year as against 113 million a year earlier. Exports of hard spring wheat at 18 million were 3 times those of a year ago. Over 26 million of the total exports were red winter and 45 million white -- both more than double a year earlier.

CANADA'S 1963 WHEAT ... crop was estimated at an all-time record of 723.4 million bushels. This is 28 percent above last year's crop of 565.6 million and 51 percent above the 10-year average of 479.8 million.

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Net value of 1962 and 1963 feed Certificate Pool remaining for liquidation on November 8 totaled \$647,183,491.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. November 14, to 3:30 p.m., e.s.t. November 15, 1963.

Export Areas	WHEAT RATES (Cents per bushel)			FLOUR RATES
	Hard Red Spring	Hard Red	Other	(Cents per 100 lbs.)
		Winter	classes 1/	
Export Rate Period Thru May 15, 1964				
EAST COAST				
(Including St. Lawrence and Great Lakes ports)	60	63	63	178
GULF COAST	60	63	63	181
WEST COAST	60	64	49	187

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. Excluding Durum wheat.

2/ Includes Puerto Rico.

November 22, 1963

SOYBEAN AND WINTER WHEAT PRICES LOWER

Soybeans and winter wheat prices declined sharply during the week ended November 21. Other grain prices closed about unchanged except that barley went up during the week.

Hard winter wheat prices declined 2-3¢ per bushel while red winter wheat went down 7-8¢ per bushel. Lack of export demand and some reaction to recent price advances were weakening factors. Farm selling continued slow due in part to drought conditions over large sections of the area. Spring wheat prices closed about unchanged, with demand generally good. Some improvement in flour sales was reported. Demand for durum wheat was good and prices advanced 2¢ per bushel. Wheat prices in the Pacific Northwest were about unchanged with demand about in line with current offerings. Rye prices dropped 5¢ per bushel at Minneapolis as export demand was light. Offerings were scarce.

Corn prices were mostly unchanged to as much as 2¢ lower. Demand was good but offerings were ample. The box car situation was improved but there were still problems in many areas. Oat prices were unchanged to 1¢ lower with offerings light. Barley prices went up 2-6¢ due mainly to light arrivals. Export demand on the West Coast was good. Grain sorghum prices declined 1¢ per cwt. with increased offerings meeting indifferent demand.

Soybean prices declined 14-15¢ per bushel due in part to sharply lower oil prices. Soybean oil prices declined from over 10¢ per pound a week ago to 7¢ on Wednesday. Lack of substantial export business was reported as a principal weakening factor. Soybean meal prices held rather steady during the week. Flaxseed remained unchanged with demand only fair.

Wheat, rye, corn, oats, barley, grain sorghum, soybeans, and flaxseed - amount put under price support by States	8-11
Grains - amount under price support	12

PRICE SUPPORT ACTIVITIES ... through October showed that farmers had put 138.9 million bushels of 1963-crop wheat under loan and purchase agreement. This compares with 185.2 million of 1962-crop wheat through October 1962, and 241.2 million of 1961-crop wheat through October 1961. Of the 1963-crop wheat put under price support 14.6 million bushels in loans had been repaid. Most of the wheat repayments were in Washington, 3,601,136 bushels; Kansas, 2,645,538 bushels; Oklahoma, 1,558,958 bushels; Ohio, 1,437,802 bushels; North Dakota, 1,329,027 bushels, and Oregon, 1,109,828 bushels. Nearly 15 million bushels of soybeans had been put under price support through October as against 9.6 million a year earlier. The amount of barley put under price support through October at 15.8 million is about the same as a year ago, while the quantity of oats at 21.8 million was 4 million more. Nearly 8.5 million bushels of flaxseed had been put under support by the end of October as against less than 2 million a year earlier. (Details on pages 8-12)

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Volume 11 No. 48

Washington, D. C. 20250

November 29, 1963

GRAIN PRICES GENERALLY STRENGTHEN

Stability returned to the grain market with an early recovery after the severe shock of Friday, and prices generally closed on the high side for the holiday-shortened week ended November 27. Wheat and rye prices advanced while other grains about held their own.

Hard winter wheat advanced 1-2¢ per bushel while red winter wheat went up 3-4¢. Demand was good while offerings were very light. Some optimism was reported over expected sales of wheat to Russia. Spring wheat gained 2-3¢ as large accumulated offerings were well absorbed by mills and elevators. Durum wheat declined 2¢ with indifferent domestic and export demand. White wheat held steady in the Pacific Northwest as farmers maintained a firm holding policy and export interest lagged. Rye went up 2¢ per bushel at Minneapolis.

Corn prices were mostly unchanged to 1¢ higher as exports continued large. Marketings decreased but domestic demand was only moderate. Oats held firm in quiet trading. Malting barley offerings were large and lower qualities sold at severe discounts. Feeding barley prices were steady. Grain sorghum was 1-2¢ per cwt. lower at Kansas City but 1¢ higher at Ft. Worth. Demand was slow.

Soybeans recovered from severe losses early in the period and closed about unchanged to 1¢ per bushel lower than a week ago. Demand remained good as receipts dropped sharply. Oil prices advanced slightly and meal remained steady. Export interest was fair. Flaxseed remained steady at Minneapolis.

Special Features

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Nov. 2/ 1963	Oct. 1963	Sept. 1963	Nov. 1962
Soybean Oil:					
Average price at crushing plant	Cents per lb.	9.2	9.3	8.4	8.6
Value from bushel of soybeans 1/	Dollars	0.98	1.00	0.90	0.92
Soybean Meal, 44%:					
Bulk price at Decatur	Dollars per ton	74.70	73.80	75.10	71.00
Value from bushel of soybeans 1/	Dollars	1.76	1.73	1.76	1.67
Value of oil and meal from bushel of soybeans 1/	Dollars	2.74	2.73	2.66	2.59
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.73	2.68	2.58	2.42
Spread between soybean price and value of oil and meal	Cents	1	5	8	17

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47. pounds of meal for 1962-63. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	1963-64	1962-63	1963-64	1962-63
	-- 1,000 bushels --			
Carryover 1/	15,096	57,565	8,357	3,608
Production	718,182	675,197	31,152	31,952
Total supply 2/	733,278	732,762	34,509	35,560
Adjusted total supply 3/	733,278	722,262		
Disappearance through October 31: 4/ :				
Seed, feed and residual 5/	47,000	52,400	2,500	2,221
Crushed for oil or processed	40,517	39,937	5,532	6,764
Exported	6/ 19,000	22,397	6/ 1,796	2,296
Total disappearance	106,517	114,734	9,828	11,281
Balance on November 1 for processing, export or carryover	626,761	607,528	29,681	24,279

1/ Soybean stocks as of October 1; flaxseed stocks as of July 1. 2/ Imports not included because negligible.

3/ Includes an allowance for new-crop soybeans crushed prior to October 1, but no allowance is made for new-crop flaxseed crushed prior to July 1. 4/ Soybeans, through October; flaxseed, July through October. 5/ For the entire year.

6/ Partly estimated.

GRAIN MARKETS SHOW MIXED TREND

Corn led most feed grains onto generally higher price ground but soybeans and spring wheat turned downward during the week ended December 5. Other grains registered little or no change.

Hard winter wheat closed mostly steady, but soft wheat finished around 1-2¢ per bushel higher. Offerings were scarce and usually found good demand. Issuance of an export license for wheat to Hungary added some support to the market. Spring wheat premiums were down and cash prices dropped 2-5¢ at Minneapolis. Durum wheat, however, held steady as buyers were replenishing their exhausted supplies. White wheat declined 2¢ in the Pacific Northwest despite fairly heavy export trade. Farmers maintained a tight holding policy, but most traders were reported in a long position. Rye edged upward a couple of cents in Minneapolis as very limited offerings were quickly taken despite dull rye flour sales.

Corn prices were 1-6¢ per bushel higher in closing sales at principal markets. Demand picked up as offerings from the country slacked off with harvesting of the record crop nearly completed. Oats closed steady to as much as .4¢ higher behind improved demand for limited offerings. Barley was mostly steady with not too much spot activity. Grain sorghum went up 2¢ per cwt. with improved inquiry for smaller offerings at Kansas City. Prices held steady at Ft. Worth where producers showed little interest in selling and buyers' needs were fairly well covered for the remainder of the year.

Soybeans finished mostly 2¢ per bushel lower. Light offerings generally found good demand, but the spot market was more sensitive to the unsettled action of the futures and end products markets. Flaxseed held steady at Minneapolis.

OFFERS TO PROCESS BULGUR ... from CCC-owned wheat were requested recently. Offers were requested for processing about 573,300 pounds of bulgur from about 10,988 bushels of No. 2 or better hard red wheat for donation overseas through an Agency for International Development (AID) Program. This request for processing bids continues the program under which about 337,785,600 pounds of bulgur have been processed thus far from 6,447,048 bushels of CCC-owned wheat. In a change from last year's program, the processing payments are being made in cash instead of through issuance of payment-in-kind certificates. The processing program under which bulgur is being prepared from CCC-owned wheat is in addition to the purchase program under which CCC is obtaining bulgur processed from privately-owned hard wheat for domestic and foreign donation. Bulgur is processed by boiling and drying wheat, removing some of the bran, and cracking the wheat into meal.

Grains: Export prices basis prompt or 30-day shipment, December 5, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum ^{2/}
	Grade				
			--Dollars--		
Baltimore	No. 2 Red Winter ...	2.35	1.34	2.78	1.21
Gulf	No. 1 Hard Winter				
	Ordinary protein.	2.40	1.33	2.77	2.22
	14% protein	2.48	-	-	-
Pacific Northwest ..	No. 1 Western White	2.19	-	-	1.21

^{1/} Does not include the export payment rate for wheat which on December 5, was 63¢ per bushel for red winter from Baltimore and hard winter from the Gulf and 47¢ for soft white from the West Coast.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

MOST GRAINS ADVANCE

Soybean prices advanced sharply and most other cash grains showed a higher trend for the week ended December 12.

Winter wheat edged up a little in the Southwest, while prices gained 4-7¢ per bushel in the Midwest and East. Light country marketings continued to find good demand. Export interest was active, particularly for red wheat, but there was little inclination to sell. Optimism over export prospects, especially to Eastern Europe, was a strengthening factor. Spring wheat prices closed on the firm side at Minneapolis, supported by fairly large flour sales by spring wheat mills. Durum, however, eased off 2¢ as receipts were fairly large and buyers were not pressed for supplies. White wheat ruled firm behind active demand for light offerings in the Pacific Northwest. Rye went up 3¢ on smaller receipts in Minneapolis.

Corn finished mostly 2¢ per bushel higher with light offerings failing to satisfy good demand. Oats fluctuated slightly but were generally not much changed. Supplies were light and demand improved a little. Barley held firm at most markets but lost 2-4¢ under pressure from liberal offerings at Minneapolis. Grain sorghum held about steady in slow trading.

Soybeans advanced 9-10¢ per bushel as the market reacted to sizeable export inspections and to strength in oil and meal this week. Flaxseed moved up 2¢ at Minneapolis, reflecting strength in the Winnipeg market.

NOVEMBER GRAIN EXPORT INSPECTIONS ... totaled a record 155.3 million bushels. This was 20 million bushels more than in October and 37.5 million bushels more than in November 1962. It brought the January-November total to nearly 1.3 billion bushels, or about 25 million more than the same period last year. A record-breaking 58.5 million bushels of corn inspected for export in November accounted for almost 38 percent of the total grain exported. Corn inspections also ran nearly 27 million bushels more than the previous month. Export inspections of wheat (grain only) amounted to 54.5 million bushels -- 15.4 million less than in October. However, wheat still accounted for about 35 percent of total November export inspections. Soybean inspections for export in November reached 22.5 million bushels -- up slightly from the previous month but about 4.5 million bushels less than a year earlier. Meanwhile, 11 million bushels of U. S. grain were inspected for export from Canadian ports during November. This brought the total since opening of navigation this year to 102.5 million bushels -- nearly double the 53.3 million bushels inspected in the same period of 1962.

Based on Census data for July through October and on export inspection data for November, exports of wheat and flour (in bushel equivalent) so far this season total around 313 million bushels. This is about 92 million bushels more than the same period last year. Of the 275.5 million bushels of wheat inspected for export this season, nearly 164 million bushels were hard red winter. This was 30 million bushels more than a year earlier. Inspections of almost 32 million bushels of red wheat and 23 million bushels of hard red spring more than doubled those of last year. Exports of nearly 53 million bushels of white wheat were not quite twice as large as the previous season, while the 3.1 million bushels of durum inspected were about the same as a year ago.

Grains: Export prices basis prompt or 30-day shipment, December 12, 1963

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

SOYBEANS ADVANCE - OTHER GRAINS LITTLE CHANGED

Soybeans registered another sharp upturn during the week ended December 19. Other cash grain prices showed little or no change in slower pre-holiday trading.

Winter wheat held firm in the Southwest but closed a little weaker in the Midwest. Country selling remained light, and there was little buying or selling except in CCC stocks for export at major terminal markets. Spring wheat edged up 2¢ per bushel behind good demand for light offerings at Minneapolis, while durum held steady with receipts well cleaned up despite slow semolina sales. White wheat held firm in the Pacific Northwest, influenced by continued slow country offerings and more active demand. Rye fluctuated slightly during the period but closed on a firm note in anticipation that exports will increase.

Corn prices ranged from unchanged to 2¢ per bushel higher. Demand was good, particularly from exporters, and light offerings generally found ready takers. Oats showed little change with trading limited by light offerings. Barley was not much changed at most markets, but lower qualities went up 4-5¢ at Minneapolis where receipts were smaller. Grain sorghum prices were about steady with offerings very limited.

Soybeans closed 10-13¢ per bushel higher on a late-week upturn following release of the forecast for a 701-million-bushel crop. Although it is a record crop, the forecast was smaller than many traders had anticipated it would be. Other strengthening factors were good demand for light offerings and favorable export inspections this week. Flaxseed held steady in quiet trading at Minneapolis.

<u>Special Features</u>		<u>Page</u>
Grains - export prices at specified points		2
Feed grains - CCC sales against Certificate Pool		6
Soybeans - quantity processed at mills, by months, 1956-63		6
Grains - U. S. acreage and production, 1963 annual summary		7
Food for Peace Authorization		7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support by States		8-11
Grains - quantity under price support		12

PRICE SUPPORT ACTIVITIES ... through November showed that farmers had put just under 144.7 million bushels of 1963-crop wheat under price support. This was nearly 61 million bushels less than a year earlier and the smallest quantity of wheat put under support through November since 1947. Farmers had repaid loans on 26.8 million bushels of 1963-crop wheat through November. About 41 million bushels of 1963-crop corn had been put under support, or 12.4 million more than a year earlier. Soybeans under support totaled 36 million bushels -- about 3.8 million more than through November last year. (See other price support details on pages 8-12.)

COUNTY PRICE SUPPORT RATES FOR 1964-CROP OATS ... will be the same as for 1963. Rates are based on the 1964 national average support price of 65¢ per bushel for Grade No. 3 oats. Participation in the 1964 feed grain program for corn, grain sorghum, or barley will not be a condition of eligibility for price support on oats.

INDICATIONS CALL FOR 959-MILLION-BUSHEL 1964 WINTER WHEAT CROP ... based on conditions as of December 1 and other factors, the Crop Reporting Board says. This would be 6 percent larger than the 1963 crop but 6 percent below the 1958-62 average. Acreage seeded to winter wheat in the fall of 1963 totaled 43 million acres -- 2 percent more than the 42 million acres seeded in the fall of 1962. The 1963 fall seedings were planted with national and farm acreage allotments in effect but with compliance on a voluntary basis. The 1964 all-wheat national allotment was established at 49.5 million acres excluding increases permitted in allotments on farms with small farm allotments. The 1963 wheat allotment was 55 million acres.

RYE SEEDING ... in the fall of 1963 totaled 4.7 million acres. This was 6 percent more than 1962 fall seedings and 9 percent above average. Condition of rye on December 1 was reported at 84 percent. This is 8 points below last year and 4 points below average, reflecting dry conditions in most rye producing States.

Grains: Export prices basis prompt or 30-day shipment, December 19, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	:	Wheat <u>1/</u>	:	Price	Corn	Soybeans	Barley

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

Special Features

1963 Date of Issue

ACREAGE AND PRODUCTION:

Prospective plantings	Mar. 22.
Wheat: Estimated production by states	June 14.
Quantity ground for flour by months	Aug. 30.
Yield and production, all grains (U. S.) ...	July 12; Aug. 16; Sept. 13; Oct. 11.
Yield and production, all grains (Canada) ..	Oct. 11.
Corn, grain sorghum and soybeans	Nov. 15.
Crop production - annual summary	Dec. 20.

EXPORTS (U. S.):

All grains	Jan. 11; Feb. 8; Mar. 15; Apr. 12; May 10; June 14; July 12; Aug. 9; Sept. 13; Oct. 4; Nov. 8; Dec. 13.
------------------	---

By country of destination:

Barley, barley malt, oats, rye, and flaxseed	Feb. 21; Aug. 16.
Corn, grain sorghum and soybeans	May 17; Nov. 8.
Wheat and flour	Feb. 15; Aug. 23.
Wheat flour by customs districts	Feb. 15; Sept. 6.
Grain products	Aug. 16.
Wheat and flour, by months	Aug. 23.
Grains, Title I, PL-480 export shipments ...	Feb. 8.

IMPORTS (U. S.):

All grains	Jan. 4; Feb. 8; Mar. 8; Apr. 5; May 10; June 7; July 12; Aug. 9; Sept. 6; Oct. 11; Nov. 22; Dec. 13.
Grain products	Aug. 16.
Grain for seed under Federal Seed Act	July 26.
By customs districts:	
Wheat, oats, barley, and rye	Aug. 30.

* These tables appear on various pages.

INSPECTED RECEIPTS:

By grades:

Corn Jan. 25; Mar. 22.

By class:

Wheat: Carlot, cargo and trucklot Feb. 1; Mar. 1; Mar. 29; May 3;
May 31; June 28; Aug. 2; Sept. 27;
Nov. 8; Nov. 29.

Grains:

Carlot, cargo and trucklot Feb. 1; Mar. 1; Mar. 29; May 3;
May 31; June 28; Aug. 2; Sept. 27;
Nov. 8; Nov. 29.

All grains:

Carlot, cargo and trucklot: Semi-annual. Feb. 1.
Annual Aug. 2.

INSPECTIONS FOR EXPORT:

By country of destination:

Grains: Monthly Jan. 11; Feb. 8; Mar. 15; Apr. 12;
May 10; June 14; July 12; Aug. 16;
Sept. 13; Oct. 11; Nov. 15; Dec. 13.

From Canadian ports Jan. 11; Feb. 8; Mar. 15; May 10;
June 14; July 12; Aug. 16; Sept. 13;
Oct. 11; Nov. 15; Dec. 13.

Crop year July 12.

Corn, grain sorghum and soybeans Oct. 18.

Wheat:

By classes, programs and areas Jan. 11; Feb. 8; Mar. 15; Apr. 12;
May 10; June 14; July 12; Aug. 16;
Sept. 13; Oct. 11; Nov. 15; Dec. 13.

By classes: Crop year July 19.

By ports:

Grains: Monthly Jan. 11; Feb. 8; Mar. 15; Apr. 12;
May 10; June 14; July 12; Aug. 16;

* HAPPY NEW YEAR *
* * * * *

GRAIN MARKETS RULE FIRM

Cash grain prices generally showed a steady to firm trend for the holiday-shortened week ended December 26. Trading was typically slow during the Christmas holiday period.

Most classes of wheat closed unchanged to 1 or 2¢ per bushel higher. Strengthening influences were continued light marketings by farmers, active export interest, and legislation regarding export sales to Communist countries. Many traders were reported to be marking time and delaying purchases until after the new year begins. Rye weakened slightly in dull trading at Minneapolis.

Corn prices held steady at most major markets. Offerings were light, but demand was more selective than it had been in recent weeks. Oats were not much changed as light offerings continued to limit trading. Barley looked mostly steady as trading was shackled by meager offerings, but prices edged up 2¢ at Minneapolis where arrivals sold better. Grain sorghum prices moved up 1-2¢ per cwt. as buyers raised bids in an effort to attract offerings.

Soybeans fluctuated within a narrow range and finished with prices nearly at the same levels as a week ago. Trading turned more conservative following the post-crop report spurt. Many traders busied themselves interpreting what effect the lower November crushings figure and this week's smaller export inspections would have on the statistical situation. Flaxseed advanced 5¢ per bushel in Minneapolis as producers continued to hold back marketings.

Special Features

Page

Wheat and flour - export program rates	2
Grains - export prices at specified points	2
Feed grains - CCC sales against Certificate Pool	6
Food for Peace Authorization and Agreement	6
Soybean prices compared with soybean oil and meal prices	7
Soybeans and flaxseed - supply and distribution, monthly	7

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. December 26, to 3:30 p.m., e.s.t. December 27, 1963.

Export Areas	WHEAT RATES (Cents per bushel)			FLOUR RATES
	Hard Red Spring	Hard Red	Other	(Cents per
		Winter	classes 1/	100 lbs.)
Export Rate Period Thru May 15, 1964				
<u>EAST COAST</u>				
(Including St. Lawrence and Great Lakes ports)	63	64	64	180
<u>GULF COAST</u>	63	64	64	182
<u>WEST COAST</u>	63	67	49	187

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. Excluding Durum wheat.

2/ Includes Puerto Rico.

Grains: Export prices basis prompt or 30-day shipment, December 26, 1963
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
--Dollars--					
Baltimore	No. 2 Red Winter	2.42	1.38	2.96	1.24
Gulf	No. 1 Hard Winter

^{1/} Effective loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Net value of 1962 and 1963 Feed Certificate Pool remaining for liquidation on December 20 totaled \$809,062,094.

Food for Peace Authorization and Agreement
December 19-26, 1963

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
<u>AUTHORIZATION</u>					
Israel	Dec. 19	16-133	Yellow corn	54,000	3,000
<u>AGREEMENT</u>					
				Hundred-weight	
Rep. of Congo	Dec. 23	-	Wheat flour	331,000	1,500

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Dec. 1963	Nov. 1963	Oct. 1963	Dec. 1962
Soybean Oil:					
Average price at crushing plant	Cents per lb.	8.2	9.1	9.3	8.6
Value from bushel of soybeans <u>1/</u>	Dollars	0.88	0.97	1.00	0.92
Soybean Meal, 44%:					
Bulk price at Decatur	Dollars per ton	76.75	74.70	73.80	71.00
Value from bushel of soybeans <u>1/</u>	Dollars	1.80	1.76	1.73	1.67
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	2.68	2.73	2.73	2.59
Market price of No. 1 yellow soybeans at Illinois points.....	Dollars per bu.	2.69	2.72	2.68	2.45
Spread between soybean price and value of oil and meal	Cents	-1	1	5	14

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.0 pounds of meal for 1962-63.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed
